SPL A4

LAMINATION FOR PROFESSIONALS

FEATURES

- Laminating width 260 mm
- Laminates document up to A4
- 4 rollers including 2 heating rollers
- No carrier required
- Photo safe
- Hot and cold lamination, foil and mounting up to 2,9 mm total thickness
- Speed and temperature adjust separately
- Adjustment guide
- Control panel with digital display
- 3'30 minute heat-up time
- Lamination speed up to 90 cm/mn
- Ready beep
- Auto shut-off
- Reverse function
- Full starter kit inside
- Compatible with pouches up to 250 microns per side

BENEFITS

- Heating roller technology is the most efficient lamination technology on the market today
- Quick heat-up time
- Independent, adjustable speed and temperature settings with easy-to-read digital display; offers 9 different speeds and a temperature range of 40° - 140°C
- Adjustment guide helps you choose up to 100 different application settings (depending on model size)
- Immediate temperature stabilization ensures consistent lamination quality
- Fast - can laminate one A4 document in less than 30 seconds
- Convenient - reverse mode stops the lamination process, if needed, and allows removal of documents from front
- Safe - machine turns off when no longer in use
