With its contactless biometrics technology, Timetera's A350 strong facial recognition terminal can identify a person's face in just a few seconds for precise attendance reporting. Face recognition algorithms loaded with dual HD infrared cameras make it easier and faster to identify facial features during registration and verification. The high-resolution camera and infrared function also make face recognition possible even in low light. The device has been functionally customised and is ready to be used for time attendance. For small and medium-sized businesses as well as those in need of a dependable, contactless solution, the A350 is an excellent option.

### Ergonomically Designed

The A350's design was specifically created to make it simple to align and position your face for a quick and painless verification.

### Dual HD Infrared camera

Fast camera respond to capture attendance even at low light.

### Multi-Verification Methods

You have multiple verification options with A350. Verify yourself using face, Finger, card, or even by password.

### Elegant Design

Gloss black finishing with leather texture. Solid device and exclusive look.

### Plug and Play

A350 is easy to operate, connect it to the power source and it's ready to roll!

### Excel Report

User friendly In Out Report with LATE and early out highlighted.
